Note: The area between the edge of the driveway and the right of way line shall be graded to allow the continuous, unobstructed flow of storm water. This shall be accomplished by either a swale driveway or pipe beneath the driveway. The Roadmaster, Twp Engineer or designee shall determine which method will be used. All Erosion and Sediment controls must be in place.

4. A plot plan must be drawn to scale and include the following:

- (1) The lot being served and all bordering roadways.
- (2) The location of the driveway and all buildings, sewer systems, and other structures on the lot including the distance to the side and rear property lines.
- (3) The sight distance to each side of the driveway entrance.
- (4) Stakes must be set at the edge of the roadway at the exact location prior to construction for approval by the Township.

MUNICIPAL ACTION

Driveway Swale 15 Inch Pipe 18 Inch Pipe 24 Inch Pipe 30 Inch Pipe

The Township recommends a smooth-bore Plastic or PVC be used for ease of maintenance. A swale driveway requires rock lining of the ditch line before and after the proposed driveway to prevent erosion. The Township will specify the type of stone and slope/grade requirements.
